PROJECT CHARTER	
Project Name	Interactive Map Of Canada
Date Produced	October 16, 2022
Project Goals	When a user hovers over a province it will show some facts (places to travel, the climate of that province, which sector of the province helps to grow the economy, universities and some interesting facts about the people of that province). Our main goal is to help the tourist guides and the user to pick up their travel destinations and help them to know more about a province.
Project Objectives	To achieve the project goal, we need the opinion from the users and our users can be the students, environmentalists and the people who like to know history. Also, we need opinions from the stakeholders.
Project Budget	In our project, we consider time as project cost. Therefore the budget is about 2-3 months worth of time to complete the project.
Project Sponsor	**Timothy Maciag** Ph.D. Lecturer, Software Systems Engineering
Project Manager	**Hasaan Toor** student, University of Regina

Additional Key Project Stakeholders

Rizwan Islam
Lalith Souri

Overall Project Milestones	Dates
1. Project idea selection 2. Project planning documentation	October 05, 2022 October 18, 2022
3. Project prototypes 4. Project finalized	November 4, 2022 End of November, 2022

Overall Project Risks
1. Getting Opinion from the users and stakeholder and implement that. 2. implement the facts about the province and store the data. 3. Build a user-friendly interface.
